EXHAUST ROOF VENT

2023 REDESIGNED PRODUCT

- Feature: Hinged screen
- Advantage: Removable
- Benefit: Dryer exhaust

RC PRODUCT LINE

New for 2023 is our redesigned RC (Roof Cap) product for roof exhaust applications. The floating damper wall vent serves as a path for exhaust air to exit the home with maximum airflow.

MODERN DESIGN

Introducing for 2023 is our redesigned roof vent, designed to allow for maximum airflow and is aesthetically appealing. Made from a ABS (acrylonitrile butadiene styrene) plastic.

INSTALLATION EASE

Installing the RC series is easy with all mounting holes being accessible. The flange of the roof vent allows for easy installation to prevent leaks.

MULTI- USE

The RC series of roof vents allow for you to use for clothes dryer and bath fan exhaust applications. This vent can be used in replacement or new installations. The newly designed hinged screen can be removed.

EXHAUST AIRFLOW

The redesigned damper has increased airflow with less back pressure. When in use, the damper allows exhaust air to exit the vent.
