

# Energy Saving Surge Protector

Our energy saving surge protector helps save power effortlessly through its six outlets. With 450 joules of protection, your electronics will be guarded from lightning surges as well as line abnormalities and line noise. The lighted power switch makes it easy to see if the surge protector is on or off. This product's key hole mounting allows for it to be installed in a wide variety of applications.

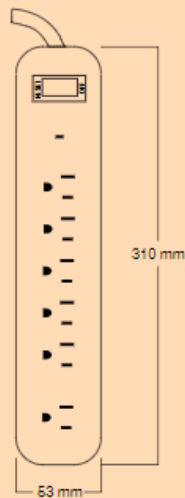

## Features

- 6 surge protected outlets
- 3 foot long heavy duty cord
- Electrical rating: 15A, 125VAC, 1875W, 60Hz
