

Easily save energy and money with this Advanced Power Strip by automatically turning off connected devices not in use. Send power where you need it most with two "Always On" outlets for equipment needing continuous power.

The adjustable threshold switch changes the sensitivity level of the power strip. The "Master-Controlled" outlets will turn off once incoming power to the "Master" falls below the set threshold, whether it is low, medium, or high. This prevents phantom loads, saves electricity, and cuts electric use.

ADVANCED POWER STRIP

WITH ADJUSTABLE THRESHOLD
AND SURGE PROTECTOR
