Care and safety

information

- Use cold water only. The operating temperature of this pitcher filtration system is 41-100°F/5-38°C.
- **Do not** use with water that is microbiologically unsafe, or of unknown quality. This filter can not filter other liquids other than tap water.
- We recommend that you store your system in the refrigerator or in a cool area that is not in direct sunlight to get refreshing, great-tasting water.
- If there is a lot of turbidity in tap water (such as cleaning the water tank or not using tap water for a long time), please flush it for a few minutes until the water turns clean before using.
- If water filter pitcher is not going to be used in a long time, please put it in a clean container with lid. Then place it in the refrigerator which will prolong the cartridge life.
- The filter must be protected from freezing, otherwise it might cause cracking and water leakage from the
- For better filtration performance, it is recommended to use it in areas where the TDS value is less than 400. If the TDS value is more than 400, please choose our reverse osmosis water filtration system via www.waterdropfilter.com.

Getting started/Instruction for use

Step 1.

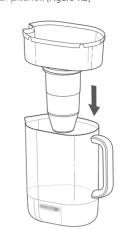

Hand-wash pitcher, lid and reservoir with a mild detergent. Don't put it in the dishwasher or use abrasive cleaners. Rinse thoroughly with water after washing.

120mm

Open the package and take out the filter. Tighten the filter from the bottom of the reservoir to ensure complete sealing. [Figure 1.1]

Step 3. Put the reservoir and filter into the tank of pitcher. [Figure 1.2]

Repeat this step twice more. Step 5. Press the button for 5 seconds until

the blue light flashes to activate the indicator. [Figure 1.3] **Note:** Repeat this step after each new filter replacement.

Fill the reservoir with cold tap water.

Allow the water to go through the

filter and then discard the water.

Replace

Change water filter

Water filter replacement consult steps 2 to 5

Change smart indicator

The filter smart indicator is replaceable. Replace it by squeezing the clamping jaw. [Figure 1.4]

During the reinstallation, make sure that the clamping jaw is inserted into the groove

Correctly dispose of the smart indicator

If the battery expires, dispose the indicator according to all applicable provision and regulation.

Technical specifications

Filter capacity: 1 month **Weight:** 2.65 lbs (1.2 kg) **Size:** 10.0 x 5.3 x 10.0 inches **Flow rate:** 0.05 gpm / 0.2 lpm

Temperature: 41-100°F/5-38°C

Questions and Answers

Q: Why does the water flow get slow? **A:** The filter cartridge may be clogged.

Please check the indicator to see if it's time to change the filter cartridge. If yes, please replace the filter cartridge immediately. If not, take out the filter and shake it intensely in order to shift the granules inside, which will improve the speed of water flow.

Q: Why does the water taste bad?

A: The product is unclean, or the filter cartridge is not installed properly. It could also be time to change the filter cartridge. Please clean the pitcher and install the cartridge correctly or replace the filter cartridge.

Q: My filter indicator is not working, I cannot see the color of the indicator!

A: The battery might be out of power. Do not worry, the filter indicator is replaceable. If it's in the warranty period, we can replace it for free.

Q: Why is the filter so large while its service life is only one month?

A: This filter adopts advanced food-grade ion exchange resin. Unlike common resin, it not only softens water but also removes all heavy metals and other pollutants in the water. The filtration performance has the same effect as the RO system. Therefore, to achieve strong removal performance, this filter has a relatively short service life.
