

# FOAMPRO® AUTO-CALIBRATOR

INNOVATIVE • SIMPLE

*NO CALIBRATING • NO GUESSWORK • NO EXCUSES*

The FoamPro® Auto-Calibrator is a low pressure polyurethane foam dispensing breakthrough that provides incredible ease of use and unprecedented productivity. The Auto-Calibrator provides precise chemical control with no manual calibration needed. The consistent ratio control provides increased productivity and maximizes yield. Consistent on ratio performance of the foam system will also ensure maximum percent empty on the cylinders, reducing the waste of returned, unused chemical. This product is available for use with all of our low pressure spray and pour-in-place polyurethane foam refillable systems.

The FoamPro® Auto-Calibrator Starter Kit includes everything you need to begin using your HandiFoam® or Polyset® low pressure polyurethane foam or adhesive refillable systems. It combines the latest technology in foam application along with ICP's reputation for producing the highest quality foam.

Adapter kits are available for current HandiFoam customers.

The FoamPro® Auto-Calibrator Conversion Kit accurately monitors usage of your foam system. This kit improves job billing accuracy with the knowledge of exact usage and better monitors percentage empty on a set of cylinders.

FOAMPRO® AUTO-CALIBRATOR STARTER KIT	F65285
AUTO-CALIBRATOR WALL MOUNT	62988511606
3/8" RED SIDE FILTER UNIT AT 72"	62988511705
3/8" BLUE SIDE FILTER UNIT AT 72"	62988511713
1/2" VALVE ASSEMBLY RED	62988510939
1/2" VALVE ASSEMBLY BLUE	62988510947
SINGLE REGULATOR FOR AUTO CALIBRATOR	62988511861
CYLINDER VENT VALVE	62988511812
HANDIFOAM CONNECTOR KIT - SYSTEM 8	F65278
HANDIFOAM CONNECTOR KIT - MAGNUM	F65277

AUTO CALIBRATOR STROKE COUNTER CONV KIT	62988511564
TUBE FITTING, 1/8" X 1/32"	26101680630
IN105 STROKE COUNTER	62988511614
TUBING, 5/32"	62988511895
